

docSTAR SPX & Enterprise Turnkey Solution System

The **SPX & Enterprise Turnkey Solutions** include a premium server and supports up to 100 users, including many ScanStations. They are available bundled with a bootable internal SATA RAID 5 array for high performance/high capacity storage or with internal RAID-1, so that third party storage can be used.

SPX includes basic document scanning and retrieval functions whereas Enterprise adds Access Management, Audit Trail, Advanced Templates with OCR, Annotations, E-Mail/FAX/Attaché and Native File Management modules.

Description	Specification
Max Users	100 (inquire about greater requirements)
Max Additional ScanStations	10
Recommended Maximum Scan/Import Volume	200,000 pages per month when DVD-RAM is used; 500,000 when using only magnetic storage.
Database	MS SQL Server (CALs are not included)
CPUs	Dual 3.0 GHz Xeon™
RAM	2 GB DDR2 registered ECC
OS	Windows Server 2003
Network Interface	1 Gigabit Ethernet
Recommended Maximum Scanner Speed	200 ppm
Two Tier Storage	160 GB (140 GB available for documents) internal RAID-1 <i>or</i> 640GB GB (620GB available for documents) internal RAID-5 with hot spare.
Chassis	The standard tower is convertible to a rack-mounted chassis (rack-mount rails sold separately)
