

document management.
Easy. Fast. Smart.

docSTAR™ Audit Trail.

Reduce your risk. Increase your productivity.

Hire an expert risk manager.

Advanced Audit Trail technology from docSTAR allows you to quickly and accurately track a wide range of user activities performed within the docSTAR system. With Audit Trail, you'll be able to instantly know every time someone has viewed or manipulated any electronic document. You'll know who performed the action. When it was done. And what was done. Instantaneously. Reducing your exposure to risk. And giving your business or organization the tools to operate more efficiently and profitably.

*Who. What. When. Where.
Why not?*

docSTAR Audit Trail:

- ★ Automatically keeps track of every time someone creates, files, annotates, prints, deletes or views documents and files in docSTAR.
- ★ Informs you when the document or file was accessed, what was done and who did it.
- ★ Dramatically reduces your risk.
- ★ Lets you quickly and easily generate a complete, paperless “paper trail” of evidence for legal and regulatory purposes.
- ★ Eliminates the need to keep and search through bulky, costly logbooks.
- ★ Helps facilitate HIPAA compliance for medical organizations.

We'll help you manage.

With Audit Trail, you can also quickly and easily track activity on any documents you wish, giving you valuable insight into work performance and flow patterns. Using that information, you can then reallocate and balance workloads to make your business or organization more productive.

Specifications

Audited Events: Create, Access (any), Modify, Delete, Purge, Print, Fax, Email, Export, Logon, Logoff, Failed Logon, and Security Rights changes.
