

The future of document management is here! docSTAR™ Eclipse has arrived.

File sharing, compliance, security, and dealing with mountains of paper challenge every business. Typical document management solutions tend to be costly and require extensive technical resources... until now!

docSTAR Eclipse service does not require specialized hardware to manage and there is no up-front capital investment. Eclipse allows remote access from any PC with an Internet connection, from anywhere in the world. Although designed using a robust enterprise architecture, Eclipse is flexible and affordable to meet the needs of a small office or departmental environments.

docSTAR Eclipse: Easy, Fast, Smart:

- ★ Quickly streamlines document processes and reduces errors
- ★ Intuitive layout is easy to use
- ★ No upfront capital investment required
- ★ Minimize business risk associated with lost files
- ★ Files can be easily and securely shared with others
- ★ Automatic backup of all your documents
- ★ Unlimited user access to any document with any internet connected computer - *instantly*
- ★ Make use of your existing investment in computers, digital copiers, and network infrastructure
- ★ Developed on Microsoft Windows® Sharepoint® Server

Meet the evolution of docSTAR

Everything you have come to love about docSTAR now without any software to install, no special hardware or upfront investments. Just sign up for docSTAR Eclipse and your office will be on your way to document management that is *easy, fast, and smart*.

Using a scanner or digital copier, users can quickly and easily convert paper documents into electronic documents and save them into the secure Eclipse site. Many different types of documents and files, including MS Word, Excel spreadsheets, e-mail messages, and countless others; can be saved, stored, and easily accessed with Eclipse. Incoming documents are placed into an Inbox for filing and the user is notified that filing is required.

Documents can be securely accessed from any web browser and an Internet connection. docSTAR Eclipse even handles the security and confidentiality of critical documents by limiting access to specific inboxes and documents that certain users can access.

docSTAR Eclipse fits naturally into day-to-day business operations - and your bottom line. Eclipse allows you to focus on growing your business rather than worrying about security, scalability, and routine maintenance.

Improving Document Workflow - quickly & easily:

docSTAR Eclipse offers users an extremely familiar and intuitive interface. All information a user would need to use is right at their fingertips, in one easy-to-understand 3-panel display that can be accessed from anywhere via a browser and internet connection.

The Eclipse interface was designed to help users:

- ★ Quickly locate documents.
- ★ Perform actions & tasks on files to ensure filing accuracy.
- ★ Capture documents via scanning or importing.
- ★ Organize the way in which to process documents.
- ★ Better share information with others... all from one place.

Buzz Space:

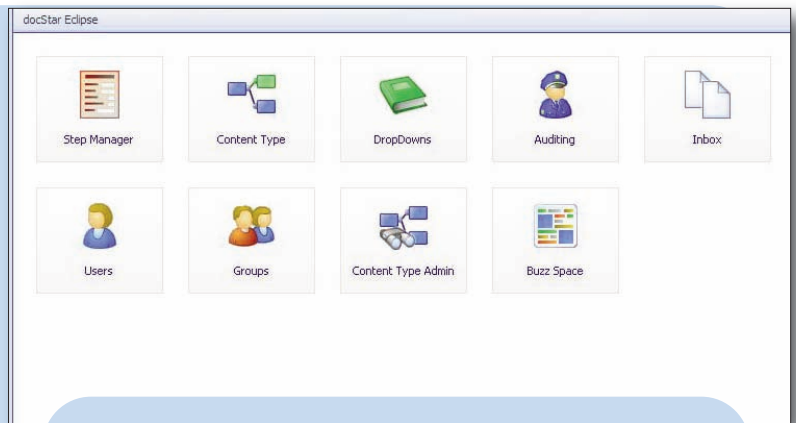

The right panel is a bit unique and something we're proud to be offering with docSTAR Eclipse. We call it the "Buzz Space".

This space is a customizable area in which you can place company announcements, advertisements, alerts – whatever.

Updating Buzz Space content is done via our **Eclipse Manager** tool in which you can post and schedule announcements.

Eclipse Manager Administration Tool:

Administrators can easily setup and configure users, groups, inboxes, and instructions on how documents are processed so that it matches the way your business runs – exactly. Security rights can be assigned to ensure that your documents are kept confidential and secure.

Define Users, Inboxes, Groups, and Business Rules

- Prevents costly misfiling of documents.
- Enforces security controls.
- Enforces compliance and reduces risk of financial penalties or litigation.

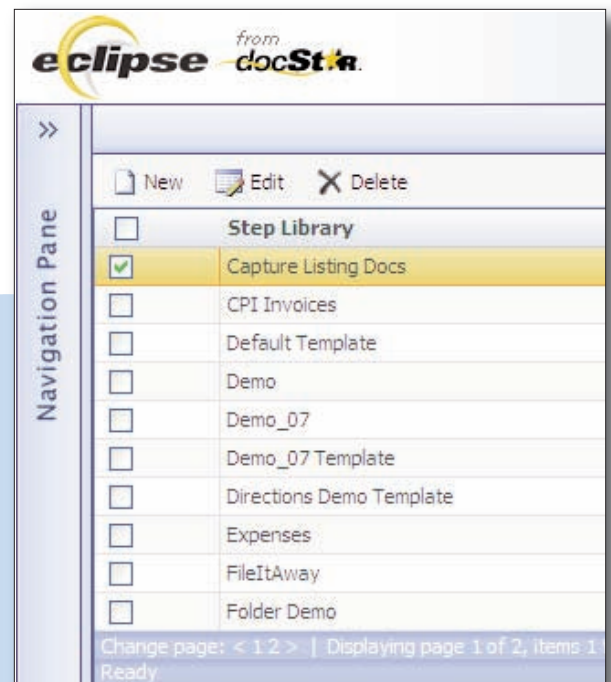

Scalability

With docSTAR Eclipse we assume all the responsibility for the performance, upgrades, and maintenance of your solution. Users receive updates and improvements without any need to apply patches or new builds... it just happens automatically the next time they log on. Customers receive all the benefits of a scalable solution without the high costs, risks and complexity normally associated with document management software.

Storage

Need additional storage? docSTAR Eclipse can be easily tailored into a configuration that meets the precise document storage requirements of your business.

Buy what you need, when you need it!

Eclipse does business the way you do... *Your Business – Your Documents!*

Every document that runs through your business has to be processed and filed in a certain way. How can you file your documents with 100% accuracy so that you can find them quickly and easily?

Eclipse does business the way you do! Using the **Eclipse Manager**, users can reproduce document processing workflows by using the **Step Manager** utility. Users have the ability to create a wide variety of reusable steps that can be stored in your own step library. Users can create a library of document processing steps that can be linked together to form a document workflow process for processing, filing, routing, and archiving consistently and accurately. Create a variety of processing steps that must be performed on each document that you manage in your business to increase efficiency.

Whether it's invoices, claims, applications, listings, purchase orders, or any other document you run your business with the Eclipse Manager is the smart way to design your document workflows, fast and easy.

docSTAR Eclipse - the easier, faster, smarter SharePoint® powered document management solution that is:

All-in-One Document Management Solution - From paper document to electronic file capture to delivery, docSTAR Eclipse is fully integrated and ready to use.

Ready When You Are - All the hardware and software are already configured and ready to go. docSTAR offers all the storage, security, and infrastructure you will need so you can focus on what really matters... growing your business. No worries about setting up servers, configuring applications or any other 'fun' stuff. With docSTAR Eclipse, you will be 'conquering the clutter' in no time.

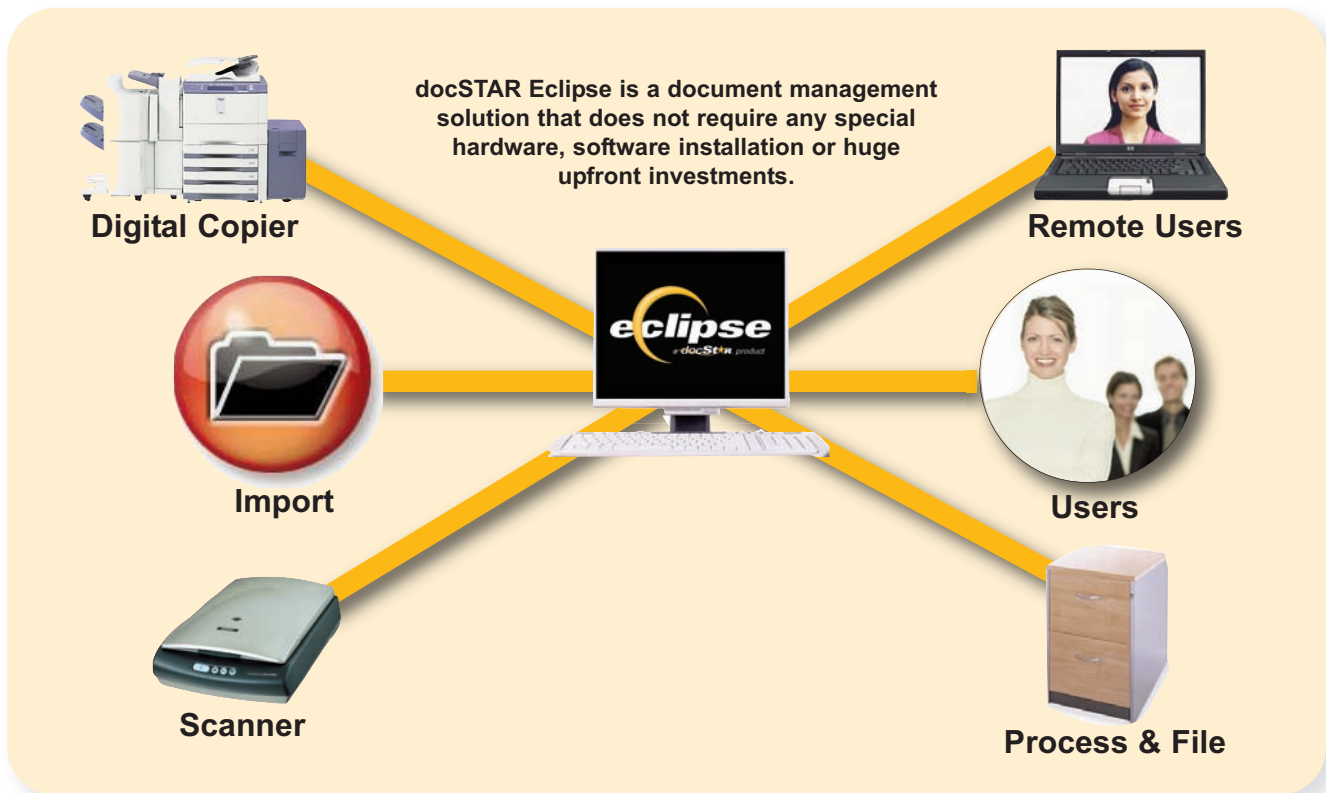

Flexible - You can increase or decrease your users and storage requirements based on need. Eclipse grows when you grow.

Web Accessible - Users have 24/7 access to Eclipse and their files from virtually anywhere in the world via a browser and internet connection.

Safe and Secure - Eclipse is a hosted solution that utilizes a secure off-site Datacenter, equipped with state-of-the-art firewalls and cutting edge technology; offering top connectivity, performance, and redundancy. Recover documents in the event of a local failure - all for peace of mind that files are safe and secure.

System Requirements:

- Microsoft Internet Explorer® 7 or greater
- High speed internet connectivity recommended
- Windows XP® (SP2+), Windows Vista®, or Windows 2003 SP2®
- TWAIN® Scanner Driver
- ActiveX® Controls Enabled
- Must have Native Applications installed to view Native Files
