

Product

DocStar IDC

Benefits

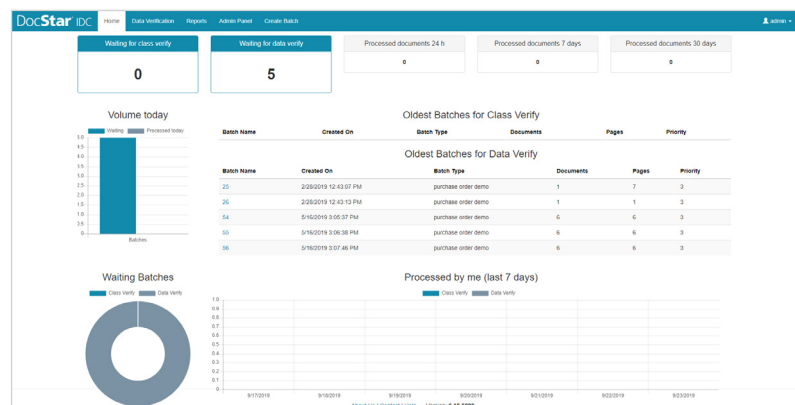

- ▶ Immediate document capture - any format, anywhere
- ▶ Extract key data fields
- ▶ Reduce manual data entry

Intelligent Data Capture

On-Premises or in the Cloud

DocStar IDC (Intelligent Data Capture) eliminates labor-intensive, error-prone and time-consuming manual document processing. Easy to use and configure, DocStar IDC is integrated with DocStar ECM to simplify data capture for content management and business process automation.

- ▶ **Capture documents as they arrive** - From any scanner, MFD, email, or watched folder
- ▶ **Document classification** - Automatically sort by utilizing neural networks based on pattern, appearance, and text into specific document classes for data extraction
- ▶ **Reduce manual data entry** - 60% to 90% by automatically extracting relevant data fields based on document type whether machine printed, hand printed, barcode, or mark sense
- ▶ **Electronically route documents** - Easily automate workflows with data-driven business processing
- ▶ **Simple implementation** - Our unique Auto-Find learns data fields on documents without endless hours of building templates, our custom machine-learning algorithms allows for fast setup of previously unseen documents
- ▶ **Visibility** - Reports display documents queued for processing
- ▶ **Compliance controls** - Apply strict processing and retention controls for regulatory compliance

Input

DocStar IDC provides multiple document import options: direct connect scanners, multi-function devices both local and remote, watched network folders, and automatic email support.

Classify

Patented document classification engine utilizing neural networks and artificial intelligence will automatically classify and separate your documents from supporting documents eliminating the manual separation of these documents.

Capture

DocStar IDC automatically finds key data fields for defined document types and learns new formats for the same document types by using custom machine-learning algorithms or quick on-the-fly user-guided teaching without endless hours of building templates. This allows for fast setup of previously unseen document formats.

Validate

During capture and data extraction DocStar IDC applies data validation parameters. Extracted data fields can be passed to a database for automatic validation. This ensures higher extraction accuracy.

Verify

During verification the operator can easily correct any exception fields that were not extracted properly. Exceptions can be caused by a poor quality scan, characters touching lines, marks on the document, etc. It is very simple for the operator, with minimal effort, to correct the exceptions, documents with no exceptions are never presented.

Submit

DocStar IDC submits processed documents to the appropriate DocStar business process automation (BPA) workflow.

About DocStar

DocStar is a browser-based enterprise content management and process automation platform that enables global digital transformation. Easy to implement and use—both in the cloud and on premises—DocStar offers proven technology and global process expertise to empower organizations to work smarter, reduce costs and invest in growth. DocStar is an Epicor solution.
